Ernakulam,Kerala,India

OBJECTIVE

Motivated AI enthusiast with knowledge of Machine Learning and Python, seeking to apply technical skills in developing innovative AI solutions while continuously learning and growing.

TECHNICAL SKILLS

Programming Languages: Python,R
Data Structures
Artificial Intelligence
Machine Learning
HTML,CSS

SOFT SKILLS

Problem-solving
Teamwork
Continuous Learning
Communication
Time Management

TOOLS

Google Colab
Jupyter Notebook
Visual Studio Code
Git/Github

EDUCATION

Integrated M.Sc. Computer Science
(Artificial Intelligence & Machine
Learning) Bharata Mata College,
Thrikkakara
Ernakulam- 682021
2022 – Present (Pursuing)

FAKE PRODUCT REVIEW

IDENTIFICATION(ACADEMIC PROJECT)

Developed an NLP-based fake review detection system to classify whether a review is human-generated or computer-generated. The project involved text preprocessing, TF-IDF vectorization for feature extraction, and training a Support Vector Machine (SVM) classifier to analyze review patterns and perform classification. Demonstrated the practical application of natural language processing and machine learning techniques in identifying automatically generated reviews.

DATA ANALYSIS INTERN(PYTHON)

SOFT NEXIS TECHNOLOGY

Gained hands-on experience in data preprocessing, dataset analysis, data manipulation, and visualization using Python libraries. Collaborated on data-driven tasks while developing technical skills, attention to detail, and problem-solving abilities.

CERTIFICATES AND WORKSHOPS

Data Science training-Teachnook
Participated in National Semiar and workshop on AI&ML-
Bharata Mata college,Thrikkakara.

AWARDS AND RECOGNITION

Secured First in Rubik's cube competition at Sacred Heart
college,Thevara

HOBBIES

Solving Rubik’s cube
Listening to songs
